

Nominee: Katherine Faull (PhD)

Bio: Since 2017, Katherine (and her husband, Justin) have been ATGA Associate Members until becoming Full Members in 2018, after planting their first batches of inoculated oak and pine trees on their property in the Adelaide Hills.

With a PhD in Public Health Entomology, Katherine has extensive experience in insect life history, identification, monitoring and treatment. She has also completed Applied Science Honours in Environmental

Toxicology and Ecology, and a Bachelor of Science in Biological and Environmental Sciences. Katherine has a strong interest in truffière management and ecology, together with research interests in the role agritourism can play in the promotion of human and environmental health and sustainability, through nature connection.

Katherine is currently employed in a Research and Scientific Affairs role, and has been involved in various governance roles in not-for-profit, private and public organisations. Katherine has served on various academic and professional committees, and has provided representation for the White Ribbon Foundation (Australian Advocate) and leadership within the Australian Science Communicators (Vice President, SA Chapter), while maintaining additional professional memberships and associations. Katherine is a Fellow of the South Australian Governor's Leadership Foundation, and is keen to begin collaborating and networking extensively within the local South Australian, and broader-Australian and international truffle growing communities.

With demonstrated research and leadership experience, impeccable communication skills and administrative proficiency, Katherine would provide effective and enthusiastic representation for the developing South Australian truffle growing community and ATGA Membership, together with a collaborative contribution to research and development across the industry.
